Plastek Dust Cover Cap- 214 NIH

Dust Cover Caps are aerosol spray cover caps, commonly paired with a necked-in can. These caps are injection molded to fit aerosol cans requiring a 214 NIH cap.

Dust Cover Caps are versatile amongst multiple consumer markets. For example, product lines benefiting from these caps are, spray paints, disinfectants, surface cleaners, hair sprays, air fresheners, etc. These Plastek stock dust cover caps are designed with a smooth gloss finish for clean and neutral appearance on the outside. A standard Neck-in-Hook (NIH) feature provides an easy push snap on and pull off action to apply or remove the cap from the can.

They are available in stock natural, white, and black, but can be custom colored as required. Please contact us to request MOQ details.

Technical Information

- Δ Dust Cover Caps are made of polypropylene.
