Plastek 89mm and 110mm Caps

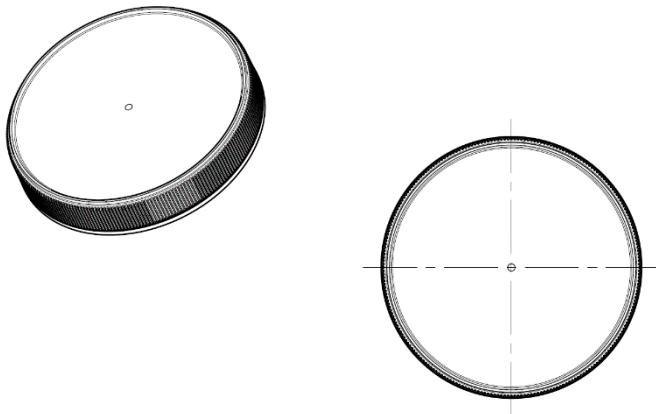

These caps are injection molded components commonly used with food grade containers. Keep your food product sanitary, safe, and fresh with these screw on caps. For consumer experience, these caps feature a serrated/ ribbed circumference to aid in the opening and closing of the container.

They are available in stock natural, white, and black, but can be custom colored as required. This cap is quoted without a liner unless otherwise requested. Please contact us to request MOQ details.

Technical Information

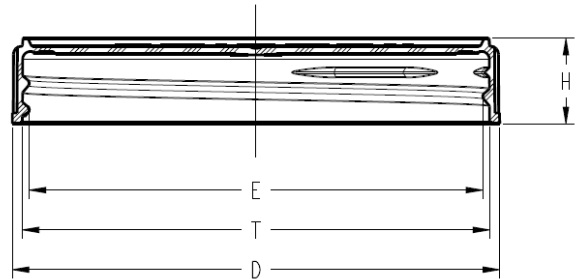

- △ Cap threads conform to SPI standards for 400 finish closures.
- △ Caps are made of high-density polyethylene (HDPE).
- △ FDA approved resin.
- △ Custom lining material can be sourced upon request. Lining material options range from but are not limited to foam, foil, or heat induction seals. Liners can be sourced to meet your intended product requirements.
