

Sherwood Jars from Plastek UK

200ml Jars and Lids manufactured in the UK

High-quality injection moulded plastic packaging ideal for a range of solutions including personal care, cosmetics, homecare and industrial.

Description

The Sherwood Jar is a 200ml, thin-wall jar suitable for a wide range of applications.

Manufacturing Options

- Prime recyclable PP as standard
- Full range of colours (in PP)
- Available in PCR
- Available with or without shives
- Can be manufactured with Anti-Microbial or Anti-counterfeit finish
- A further environmental gain can be achieved by using a Climate Positive additive available from our partners UBQ

Finish Options

Both Jar and Cap are complemented by an attractive gloss finish. Also available are opaque, translucent, pearlized and metalised Masterbatch which provide additional options to enhance the finished pack or match existing branding.
