World Class Supplier of Your Plastic Needs

Serving Clients globally, The Plastek Group is a trusted global supplier of premium quality injection molding tools and rigid plastic-molded packaging. As an innovative plastics processor, we can provide a wide range of targeted solutions that meet your company's unique challenges. Our 70 years of experience enable us to serve businesses across a broad spectrum of industries.

Stock Packages

Our stock designs are offered in a variety of shapes and sizes, for many general purpose consumer goods. Review options here in this product catalog and find the stock packaging solution for your unique product applications.

Company Introduction Video

Our top fill oval sticks primarily use the propel/repel mechanism with a center screw that moves product up and down. We also carry mini oval packaging options ranging from 0.5 to 1 ounce with the push-up style. In this design, a small platform pushes product upward.

All of our oval propel/repel sticks use polypropylene (PP) for the barrel, cap, and screw. The internal platform is made from high density polyethylene (HDPE). We use a precision injection molding process to achieve precise dimensions. Choose from domed or flat caps for your oval packaging.

Plastek has two stock designs for soft solid or gel propel/repel containers: Narrow Gel and Wide Gel. Both design options are made from injection molded plastic. The barrel, screw, dome, and cap are made from polypropylene (PP), and the platform is made of high density polyethylene (HDPE). Decoration options are available upon request. Both options are available as top fill only.

NARROW GEL PROPEL/REPEL

Our narrow gel propel/repel sticks feature a slimmer design with three small slits, in the dome covering. This dome design ensures users have control over the amount of product they use. Fill weight for the narrow design is 0.5 ounces to 3.4 ounces.

DIMENSIONS (Inches)

OVAL NARROW GEL/SOFT SOLID PROPEL/REPEL ASSEMBLY										
FILL WEIGHT		BARREL			DOME DIMENSIONS			CAP DIMENSIONS

3.40	96.39	1.24	5.070	2.18	1.322	2.260	.943	1.392	2.332	1.514

WIDE GEL PROPEL/REPEL

The wide gel stick design uses a dome with a series of small holes for product to push through, offering more product coverage than the narrow design. Fill weight for the wide design is 3 or 4 ounces.

DIMENSIONS (Inches)

OVAL WIDE GEL/SOFT SOLID PROPEL/REPEL ASSEMBLY										
FILL WEIGHT		BARREL			DOME DIMENSIONS			CAP DIMENSIONS		
OZ.	GRAMS	A	B	C	U	V	W	X	Y	Z

The propel/repel design, or twist-up tube, features an internal corkscrew post that runs through the solid product. As the user twists the bottom, the post spins to move the product upward. Propel/repel tubes have a standard cap design for all tubes except for the smallest lip balm size.

ROUND PROPEL/REPEL

The barrel, screw, and cap of our round sticks are made from polypropylene (PP). The platforms are made from high density polyethylene (HDPE). We apply a plastic injection molding process to create round stick packaging for various applications.

Round push-up sticks use a simple internal mechanism to move product up to the top of the tube. A small platform inside the tube holds the solid product and moves the product upward. Push-up tubes have various cap types based on the size of the packaging.

ROUND PUSH-UP

DIMENSIONS (Inches)

ROUND PUSH-UP ASSEMBLY Top-fill assemblies with platform only, no screw

FILL WEIGHT		BARREL			CAP	
OZ	GRAMS	B	C	D	X	Z
2.50	70.87	3.00	1.78	2.30	1.77	1.52
2.75	78.57	3.42	1.81	2.67	1.77	1.52
3.00	85.71	3.03	1.80	2.38	1.90	1.27

The barrel and cap of our round sticks are made from polypropylene (PP). The platforms are made from high density polyethylene (HDPE). We apply a plastic injection molding process to create round stick packaging for various applications.

Upon selection of the choice fill weight, please note our stock barrels are offered with the corresponding cap styles as referenced in the drawings above. Serrated Cap only available in sizes 2.5oz & 2.75oz. Smooth Cap only available in size 3.0oz.

Single Wall: Straight base jars with a single wall work for a wide range of products. We can manufacture these jars with polypropylene (PP), polystyrene (PS), or styrene acrylonitrile (SAN) resin. Choose from organic frost or smooth finish.

Double Wall: Straight base jars with a double wall design have an interior wall and an exterior wall. The interior jar holds the product, and the exterior layer adds extra protection. Double wall exteriors come in polypropylene (PP), polystyrene (PS), or styrene acrylonitrile (SAN) resin. Interior jars are made from polypropylene only. Available finishes include in-mold frost, organic frost, and smooth.

Caps and closures have a major impact on user experience, so picking the right one is essential. These parts must be produced with the utmost quality control to ensure they twist onto jars tightly and keep the product secure. At Plastek, our selection of cap designs offers the quality manufacturing your packaging needs.

Our plastic caps and closures are designed for our straight and round base jars. Choose a design that best fits your brand and the feel of your product.

The Plastek Group offers a wide range of stock cap designs to work with our straight and round base jars. These options include:

- **Straight Side:** Our straight side caps are short in height with no rounding. This design can offer a contemporary feel for your jarred products. Our straight side caps have the widest size range of our stock cap designs.
- **Classic:** The classic cap offers the tallest height and includes a slight rounding along the top.
- **Domed:** The fully rounded corners of the domed cap add a more organic feel to your jar's design. Pair the domed cap with the round jar for softness on all edges.
- **Domical:** Our domical cap is the moderate option between the domed and straight side cap. The edges are slightly rounded.

Straightside Cap

Classic Cap

Domed Cap

Domical Cap

Our container caps are injection molded with high-density polyethylene (HDPE) and FDA-approved resin for a smooth finish. A ribbed circumference improves user experience and is available in stock natural, white, and black. We can also create custom colors if required. Available as 89mm or 110mm.

The standard cap design comes without a liner, but we can include one upon request. Material options may include foam, foil, and heat induction seals.

CONTAINER CAP

89mm Cap: Our 89mm cap is 0.64 inches tall and features threads that conform to SPI standards for 400 finish closures.

38 mm PCO-threaded cap made of HDPE with food-grade colorants, compatible with PCO-38 finish bottles.

It features a double-seal system (inner and outer plug) and a segmented tamper-evident band. The ribbed surface improves grip and ergonomics during opening and closing.

Suitable for plastic bottles across multiple segments and for degassed liquid, semi-liquid, or solid products such as juices, dairy products, coconut water, capsule or powder supplements, and other solids, provided prior compatibility testing and validation.

The Plastek Group offers one stock dust cover cap that is suitable for aerosol cans needing a 214 Neck-in-Hook (NIH) cap. These 214 caps have a 2.788 inch diameter and measure 2.15 inches tall. We can work with your team to develop a custom color based on your branding.

All stock dust cover caps are made from polypropylene and feature a standard NIH design along the opening. This design allows for easy push and pull action from applying and removing the cap. A snap signifies that the cap is firmly in place.

Our aerosol can caps work for a wide range of industries. Personal care and beauty products like shaving creams and hairspray often use this cap type. Home care items like disinfectants, surface cleaners, and air fresheners also need these caps. In construction, spray paint uses these caps.

Our disc top cap is the ideal solution for functional, and practical packaging. Designed with durable materials and an ergonomic format, it allows quick opening and closing with just one touch, delivering convenience and safety to the consumer. Easy to use, compatible with bottles of different volumes, perfect for cosmetics, shampoos, conditioners, liquid soaps, creams, and personal. Dosage control, ensures precise product dispensing, reducing waste.

Compatible with a 24-410 neck, we manufacture this stock product using polypropylene (PP), and in stock colors of white, black, green, brown, and blue.

Flip-top closures are excellent cap designs that work well for various products. These closures are often found in health and beauty and personal care items, such as shampoos, hand sanitizers, and lotions. In the food and beverage industry, they are used for condiments, dressings, and sauces. Available as 24mm or 28mm.

FLIP-TOP CAP

24mm Flip-Top: Our 24mm flip-top bottle caps are the smaller of our two stock designs in this category. The height of this cap measures just over 0.8 inches and has a tight arrangement of threads inside for a snug fit on smaller bottles.

DIMENSIONS (Inches)
